

OUR PROJECT

EpilepsyPOWER project is co-funded by the European Commission within the Erasmus+ funding programme and actively driven by partner organisations in Italy, Germany, Bulgaria, Ireland and France, as introduced in our first newsletter. The goal of EpilepsyPOWER is to improve opportunities for the inclusion of people with epilepsy (PwE) in employment. The final objectives are to:

- Increase the number of people engaged in relevant corporate social responsibility epilepsy-friendly initiatives
- Spread a culture and a practice for the implementation of inclusion systems for PwE, based on the enhancement and valorization of their abilities
- Support universities, companies, micro and small enterprises in inclusion improvement.

PROJECT RESULTS

PR01: Operational framework and learning methodology;
PR02: Integrated online platform for digital integrated learning, multilevel cooperation and resources sharing;
PR03: Collaborative labs for best practices;
PR04: Learning contents and classroom guidelines;
PR05: Assessment online tool and epilepsy label.

TARGET GROUPS

Target group 1: People with epilepsy (PwE)
Target group 2: Higher education institutions' staff and end-users (professors, university staff, placement officers, students), entrepreneurs/managers, employees, recruiters, HR experts and recruitment agencies

- ✓ Second Transnational Project Meeting: Grenoble, France, on 15-16 May 2023;
- ✓ Operational framework and learning methodology: This document, available in 5 languages, brings together the results of a literature review and surveys of both people with epilepsy, and representatives of higher education institutions (HEI). This work aimed to understand the impact of epilepsy on those affected, in relation to their ability to participate fully in education and employment. It also assessed the level of knowledge about epilepsy held by staff working in HEIs, and the supports offered by HEIs to people with epilepsy. This work will now guide the development of the following work packages and associated deliverables - including learning modules and other resources.
